

## SUMMER IS ALMOST HERE!

There's a lot to consider about your pet's safety during the summer months.

Make sure to:

- Never leave your pet unattended in a vehicle
- Provide outdoor pets with access to water and shade
- Let any chemical treatments on your lawn dry before allowing your pet to walk on them
- Use flea and tick prevention products such as Frontline or Nexgard

Going on vacation this summer and don't have a place for your pet to stay? We have plenty of space for boarding, so call today to secure a place for your dog or cat.

Sometimes during boarding, there are airborne viruses floating around. We require the Bordetella vaccination to reduce the risk of kennel cough and a current fecal exam to reduce the risk of intestinal parasites. This is a good choice if you are planning to board your dog or even take them on vacation with you. Call today for more information about this vaccine.
